

Affected Public Mailing Program

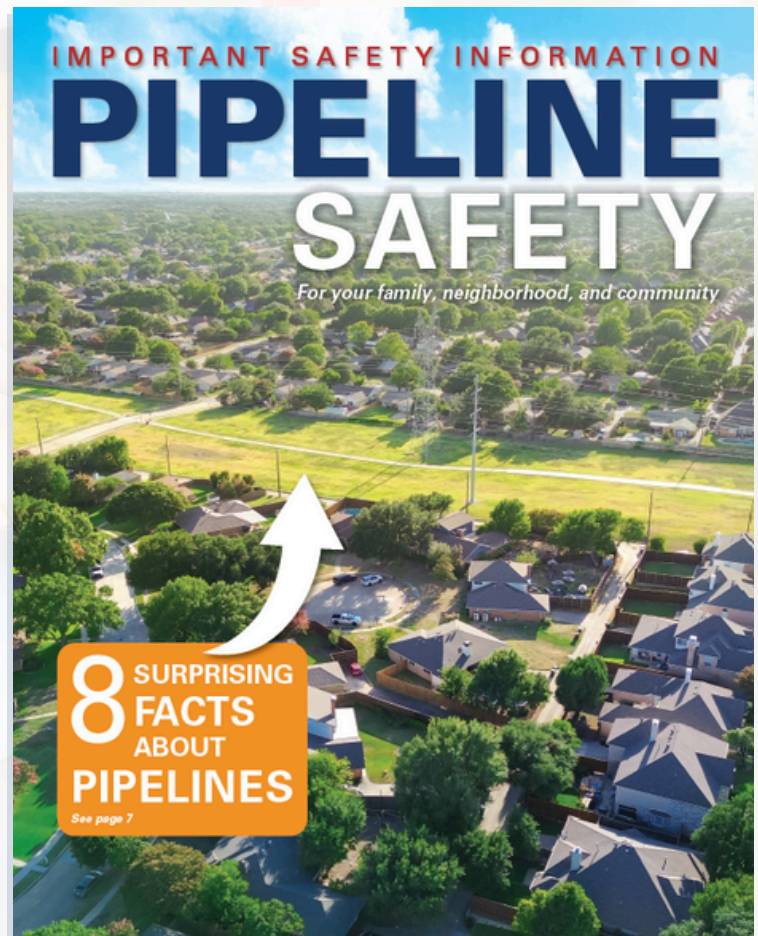

This innovative mailing leverages a collaboratively developed brochure along with customized QR codes and webpages to share important safety information with affected public stakeholders along pipeline rights of way. Program also includes four-year effectiveness measurement!

- Mailing to stakeholders within 660 feet of the pipeline (or customized based on operator needs)
- Effectiveness measurement (Four-Year Cycle)
- Operator-specific information printed on brochure
- QR code and operator-specific webpage
- Spanish translation available via QR code/website
- Web-based and PDF documentation
- Audience includes landowners, residents, farmers, schools (public and private), businesses
- Customers can also be included using operator-provided lists
- Annual program commitment
